

KELCHTM spiral gauges and caps

The **KELCH** series of contents gauges, caps and dipsticks are designed for use on metal and plastic storage tanks as used in the off-highway, lawn care, marine and generator set markets.

The gauge mechanism is simple and trouble free for long life and reliability in service. The caps have the same head configuration as the gauges and both can be customised to include special dial printing, vent styles and material colours.

Further options for the caps include lanyards and custom printing, and for the gauges, the spiral and frame in alternative materials and limited spiral twisting for long filler necks.

Utility 175 Series Gauge

Fits all 1.3/4" buttress threads 6 tpi
 Plastic caps in K100 Nylon 6 Copolymer
 For use on plastic tanks
 Lengths from 5" - 23" in 1/4" increments
 Fits welded adaptor G/MP2

Guardian 225 Series Cap & Gauge

Fits all 2.1/4" buttress thread necks
 Plastic caps in K100 Nylon 6 Copolymer
 Gauge lengths from 5" - 23" in 1/4" increments
 Guardian design for added gauge protection
 For use on plastic tanks
 Fits welded adaptor G/MP5

Suregrip 225 Series Cap & Gauge

Fits all 2.1/4" buttress thread (5 tpi) necks
 Plastic caps in K100 Nylon 6 Copolymer
 Gauge lengths from 5" - 23" in 1/4" increments
 For use on plastic tanks
 Fits welded adaptor G/MP5

Utility 228 Series Cap & Gauge

Fits all 2. 9/32" quarter turn bayonet type filler necks
 Plastic caps in K100 Nylon 6 Copolymer
 For use on metal tanks
 Gauge lengths from 5" - 23" in 1/4" increments
 Fits welded adaptor G/MP6
 Positive stop (cannot over tighten)

Guardian 228 Series Cap & Gauge

Fits all 2. 9/32" quarter turn bayonet type filler necks
 Plastic caps in K100 Nylon 6 Copolymer
 Gauge lengths from 5" - 23" in 1/4" increments
 Guardian design for added gauge protection
 Fits welded adaptor G/MP6
 Positive stop (cannot over tighten)

Remote Series of Gauges

Mounting via grommet or 1" - 11.5 NPSM thread with O-ring
 Plastic caps in K100 Nylon 6 Copolymer
 Lengths of 5" - 23" in 1/4" increments
 Permanent mount for added security
 Automotive style indicator
 Low profile & compact
 For use on metal or plastic tanks

TIPSTM 350 Tank Inversion Protection System

Fits all 2.1/4" or 3.1/2" buttress thread (5 tpi) necks
 Meets ANSI spec. Z130.1 1986 for rollover protection
 Minimises leakage when tank inverted (35° angle or more)
 Wide diameter for easy fill
 Available as cap only
 For use on plastic tanks
